5 mins 看懂 any Node.js project

find 4 files first

1. package.json

<Json>

"express" understood Express server

"mongoose" ⟹ MongoDB database

"jsonwebtoken" JWT authentication

2. server.js

<JavaScript>

app.use("/api/auth", request("./routes/authRoutes"));

知道有哪些 API

/api/auth

3. routes folder

routes

open

|_ authRoutes.js

router.post("/register", ctrl.register);

router.post("/login", ctrl.login);

立刻知道有哪些功能

4. models folder

models

|_ user.js

知道database结構

User
